WIFERION is now TESLA ENGINEERING GERMANY

Ladies and Gentlemen,

the only constant factor in the universe is change - the transformation to an all electrified world is in full swing. And our start-up is changing with it: There has been a change of control at our company and we are now Tesla Engineering Germany GmbH to continue our mission on a bigger scale.

In future, please address communications to us by post to:
Tesla Engineering Germany GmbH, Munzinger Str. 1 D-79111 Freiburg, Germany.

Your contact persons and contact numbers will remain unchanged, just like our VAT ID. The website address for our digital presence remains unchanged (www.wiferion.com) as well as the email address of your contact person: firstname.lastname@wiferion.com.

We would like to ask you to update your systems to include our new corporate name as soon as possible: from 20th of July we will not be able to process invoices, deliveries, orders, etc. under our old name (Wiferion GmbH).

We thank you for your support during this upcoming time of change.

With kind regards,

Florian Reiners
Managing Director

Johannes Mayer
Managing Director
